On January 22, 1994, two-year old Renee Goode played happily with her sisters and cousin, as the four of them enjoyed an impromptu "slumber party" at the home of her father, Shane Goode. The next day she was dead. The local medical examiner could not determine the cause of little Renee's death. But her mother Annette and grandmother Sharon were convinced she'd been murdered--and that they knew the identity of Renee's killer: her handsome father, Shane Goode, a manipulative, emotionally abusive man who displayed virtually no interest in Renee--until he took out a \$50,000 insurance policy on her life. With the help of a courageous female police investigator and Assistant DA, Sharon launched a case against Shane and had Renee's tiny coffin, lovingly filled with her favorite stuffed animals, exhumed from its final resting place. And her small corpse revealed what her grandmother had suspected all along: cold, calculating Shane Goode had murdered his own daughter to cash in on her death. *To the Last Breath* is the winner of the 1999 Edgar Award for Best Fact Crime.

The Guardian's Best Science Book of 2017: the fascinating science and history of the air we breathe. It's invisible. It's ever-present. Without it, you would die in minutes. And it has an epic story to tell. In *Caesar's Last Breath*, New York Times bestselling author Sam Kean takes us on a journey through the periodic table, around the globe, and across time to tell the story of the air we breathe, which, it turns out, is also the story of earth and our existence on it. With every breath, you literally inhale the history of the world. On the ides of March, 44 BC, Julius Caesar died of stab wounds on the Senate floor, but the story of his last breath is still unfolding; in fact, you're probably inhaling some of it now. Of the sextillions of molecules entering or leaving your lungs at this moment, some might well bear traces of Cleopatra's perfumes, German mustard gas, particles exhaled by dinosaurs or emitted by atomic bombs, even remnants of stardust from the universe's creation. Tracing the origins and ingredients of our atmosphere, Kean reveals how the alchemy of air reshaped our continents, steered human progress, powered revolutions, and continues to influence everything we do. Along the way, we'll swim with radioactive pigs, witness the most important chemical reactions humans have discovered, and join the crowd at the Moulin Rouge for some of the crudest performance art of all time. Lively, witty, and filled with the astounding science of ordinary life, *Caesar's Last Breath* illuminates the science stories swirling around us every second.
