This book is a must read for anyone deploying BusinessObjects. It covers everything from planning your upgrade to the latest release, to best practices in universe design, and powerful report creation that maximizes business insight. This book covers the most frequently used features for the full BI suite, in one comprehensive book. There's in depth coverage of Designer, security via the Central Management Console, InfoView, Web Intelligence, and Desktop Intelligence. It goes beyond step-by-step instructions to cover how and why in a business context. Transition notes are interspersed for version 5 and 6 customers to understand the biggest changes in XI Release 2. If you drive BI requirements in your company or are a data warehouse program manager, Business Objects administrator, report author or consumer, this book is for you.

This is a complete learning system for Business Objects XI Designer. It is completely dedicated to teaching you how to become a competent Universe Designer. It discusses how to create a basic universe and then, discusses many of the complications that may arise when designing universes. These topics include chasm traps, fan traps, multi-keyed property tables, double-counting measures, multiple fact tables and more. "Creating Universes with Designer XI" is a wonderfully presented book with hundreds of large graphics and over 28,000 words. The topics are presented in a very smooth and organised manner, which makes the book very easy to learn from. This book comes complete with a CD that has an Adobe Acrobat presentation with links to many videos of the examples in the book. This allows readers to not only read the text, but they can also view the videos of the examples. This presentation is also very portable and may be used to train fellow employees that have also purchased the book. The text, graphics, presentation, videos, and author availability make this book a very powerful package that gives people every opportunity to learn how to become professional Business Objects Universe Designers.

The authorized guide to the latest edition of the #1 business intelligence software product - Crystal Reports. More than 16 million licenses of Crystal Reports have been shipped to date. This book is a reference designed to provide hands-on guidance for the latest release of the product suite. The latest version of Crystal Reports and the Business Objects enterprise reporting suite delivers vast product enhancements and a tighter integration that will drive upgrades from licensees. Brand new features (e.g. Dynamic and Cascading Parameter Generation) will also appeal to new audiences. Over 1 million new Business Intelligence licensees will be migrating to the Crystal Enterprise Reporting platform, as this is the first release of the software with the existing Business Objects (BO) products being integrated into the Crystal infrastructure. As Business Objects insiders, the authors bring unique and valuable real-world perspectives on implementations and uses of the Crystal Reports product. The book also includes content, tutorials and samples for reporting within the Microsoft Visual Studio.NET and J2EE development environments and also on top of the SAP Business Information Warehouse (BW) and the Peoplesoft platform. Advanced content on report distribution and integration into the secured managed reporting solution known as Business Objects Enterprise XI, is also now included in this definitive user guide with coverage on the new Web Services SDK.

The Original Ultimate Resource for Business Objects That s Better than Aspirin and it Gets You Home Faster. Creating Documents with Business Objects XI V3 is a comprehensive self-training manual that will teach you how to use Web Intelligence to create powerful, professional reports. CCH's Corporate Controller's Handbook of Financial Management is a comprehensive source of practical solutions, strategies, techniques, procedures, and formulas covering all key aspects of accounting and financial management. Its examples, checklists, step-by-step instructions, and other practical working tools simplify complex financial management issues and give CFOs, corporate financial managers, and controllers quick answers to day-to-day questions.

Pro Crystal Enterprise/BusinessObjects XI Programming shows you how to create customized solutions using the Business Objects/Crystal Enterprise object model. Here you'll see the object model utilized to create professional-quality tools like on-demand web services, report metadata extraction, scheduling, security, and user management. Author Carl Ganz explains in detail how to build advanced reporting solutions for Crystal Enterprise/Business Objects XI. He shows how to integrate CE/BO XI with .NET 2.0 and Visual Studio to create more flexible, tailored, and responsive reporting solutions than have previously been possible. In short, you'll surpass what you thought you could achieve, and learn to create almost any imaginable reporting solution that Business Objects XI can handle.

This text explains and synthesizes the functioning and relationships of numerous Defense, Joint, and Army organizations, systems, and processes involved in the development and sustainment of trained and ready forces for the Combatant Commanders. It is designed to be used by the faculty and students at the U.S. Army War College (as well as other training and educational institutions) as they improve their knowledge and understanding of "How the Army Runs." We are proud of the value that senior commanders and staffs place in this text and are pleased to continue to provide this reference.

Learn to create powerful web intelligence reports using tables, cross-tabs, and charts. Throughout the text there are well-thought-out examples on how to use these report structures to effectively transform corporate data into information that your company can use. Data can be presented many different ways, ranging from boring to exciting. Learn how to use the analysis tools to create interactive analytical reports that can rival dashboards in both analytics and performance, usually with less development time than dashboards. Web intelligence offers many powerful functions that can be used to create formulas that allow for highly effective analysis of corporate data. Discover how you can use these formulas to transform everyday numbers into useful decision-making tools. Corporate data can be very large and accessed through many different universes. Learn how to build efficient queries with custom query filters, sub-queries, and database ranks. Also, learn how to create multiple query documents that take advantage of these many universes.
