This book combines 4 radio manuals into a single volume bringing all of the radio manuals I have written so far together. I've tried to organize them in a way which allows you to make a logical progression through the manuals as you read through this book.If you buy this volume you will be getting 4 manuals for the price of 3. The contents of this manual are: 1. Radio Basics This book gives the basics of radio and how it is used. If you are interested in learning more about radio and radio communications this manual would be a good starting point for learning about it. 2. Personal Radio Communications This book provides a description of and an introduction to the different types of radio communication available for personal use. Information is provided for each of the different radio services available for personal use along with the frequencies and transmitter power levels available for each. 3. MURS Radio Handbook This manual provides information about the Multi Use Radio Service which is a license free form of two way radio communications for personal and business use. The author provides information about the equipment available, types of installations, reasonable range expectations, and many other aspects of MURS installation and use. If you are interested in two-way radio for yourself or your business this manual provides you with a good starting point. 4. General Mobile Radio and Family Radio Service Handbook This manual provides information about the General Mobile Radio Service which is a licensed form of two way radio communications for personal use. The author provides information about the equipment available, types of installations, reasonable range expectations, and many other aspects of GMRS installation and use. If you are interested in two-way radio for yourself or your business this manual provides you with a good starting point.
