Discover BIM: A better way to build better buildings Building Information Modeling (BIM) offers a novel approach to design, construction, and facility management in which a digital representation of the building product and process is used to facilitate the exchange and interoperability of information in digital format. BIM is beginning to change the way buildings look, the way they function, and the ways in which they are designed and built. The BIM Handbook, Third Edition provides an in-depth understanding of BIM technologies, the business and organizational issues associated with its implementation, and the profound advantages that effective use of BIM can provide to all members of a project team. Updates to this edition include: Information on the ways in which professionals should use BIM to gain maximum value New topics such as collaborative working, national and major construction clients, BIM standards and guides A discussion on how various professional roles have expanded through the widespread use and the new avenues of BIM practices and services A wealth of new case studies that clearly illustrate exactly how BIM is applied in a wide variety of conditions Painting a colorful and thorough picture of the state of the art in building information modeling, the BIM Handbook, Third Edition guides readers to successful implementations, helping them to avoid needless frustration and costs and take full advantage of this paradigm-shifting approach to construct better buildings that consume fewer materials and require less time, labor, and capital resources.

Samborn and Yelin offer a modern, readable approach to effective legal writing with the fifth edition of Basic Legal Writing for Paralegals. The authors provide comprehensive coverage in an accessible format tailored to the needs of paralegal students. The practical approach emphasizes the role of the paralegal and how different types of legal writing are used in practice. The text begins with an overview of the legal system that provides clear context for the different types of writing covered in the text. Then, the authors give step-by-step instruction on the writing process, leading students through each stage of legal writing, from prewriting strategies to revising. The comprehensive coverage includes the IRAC method, how to synthesize cases and authorities, legal memoranda, persuasive writing, in-house and objective client documents, and letters, and the citation coverage has been updated to the 20th edition of the Bluebook and the 5th edition of the ALWD Guide to Legal Citation.

Perfect for taking notes, agendas, to-do lists, brainstorming, or as a diary. 150 lined pages to create your way to an amazing day! Just the right size to take on the go. Makes a wonderful gift! Size: 6 x 9 inches

At hundreds of thousands of commercial, industrial, and military sites across the country, subsurface materials including groundwater are contaminated with chemical waste. The last decade has seen growing interest in using aggressive source remediation technologies to remove contaminants from the subsurface, but there is limited understanding of (1) the effectiveness of these technologies and (2) the overall effect of mass removal on groundwater quality. This report reviews the suite of technologies available for source remediation and their ability to reach a variety of cleanup goals, from meeting regulatory standards for groundwater to reducing costs. The report proposes elements of a protocol for accomplishing source remediation that should enable project managers to decide whether and how to pursue source remediation at their sites.

The purpose of this notebook is to assist educators who are designing and implementing inservice education programs to facilitate the effective use of computer integrated instruction (CII) in schools. It is divided into the following five sections: (1) Effective Inservice (a brief summary of inservice literature focused on inservice dimensions and design principles); (2) Background Information (an overview of computers in education and a discussion of the roles of computers in problem solving); (3) Initiating/Planning an Inservice (suggestions for preliminary planning and activities and a sample timeline for those activities); (4) An Eight-Session Elementary School Inservice (2-hour sessions on interpreting data with graphs, integrating graphing software with existing materials, unstructured and structured data, structuring and analyzing data, database and word processing, prewriting activities with word processing, process writing conferences and Formula Vision, and revising and editing with a word processor); and (5) Instruments and Evaluation (a variety of instruments for needs assessment, formative evaluation, and summative evaluation). Each 2-hour elementary school inservice session contains some or all of the following: narrative overview, script (topics, objectives, materials, activities), timeline, handouts, and readings. Also included are appropriate articles from issues of "The Computing Teacher," and a Macintosh diskette. References are listed in the first three sections. (DB)
