Key concepts and terms clarify essential terminology. Potential Nursing Diagnosis tables give several possible nursing diagnoses for a particular disorder along with the associated signs and symptoms. Vignettes offer succinct, real-life glimpses into clinical practice by describing patients and their psychiatric disorders. Assessment Guidelines familiarize readers with methods of assessing patients. Critical thinking questions introduce clinical situations in psychiatric nursing. Key Points to Remember outline the main concepts of each chapter in an easy to comprehend and concise bulleted list.

Accompanying CD-ROM has review questions for the NCLEX examination, interactive exercises, animations, and an audio glossary.

This psychiatric-mental health undergraduate textbook, based on the theories of Hildegard Peplau and Joyce Travelbee, is the first recent book devoted to interpersonal relations as the foundation for therapeutic practice in psychiatric nursing. It guides the student through the essential phases of self-discovery necessary to integrate interpersonal nursing theory into practice, and provides a historical overview of the profession. The book addresses the most current ISPN and APNA competencies and presents content designed to foster self-growth, and critical thinking and decision-making skills, as well as to implement therapeutic interventions. It offers an overview of theories of mental illness and a detailed discussion of commonly seen psychiatric disorders, and addresses mental health care settings across the lifespan and different populations. Clinical case studies and first-hand accounts vividly describe the realities of living with specific mental illnesses. "What would you do?" questions stimulate discussions, and sample and practice care plans for chronic mental illness facilitate integration of concepts into practice. Evidence-based practice summaries from psychiatric nursing and related research literature are included, and NANDA guidelines are integrated throughout. A new chapter with DSM-V updates is also available. This affordably priced text additionally comes with supplementary materials for both teachers and students, including handy review guides, summaries, drug monographs, and hyperlinks to films and video illustrating content. A test bank and PowerPoint slides are also available for instructors. Key Features: Integrates and applies the Peplau/Travelbee interpersonal relations theories to the four-step Assessment, Planning/Diagnosing, Implementation, and Evaluation (APIE) nursing process Addresses critical thinking, clinical decision making, therapeutic interventions, and mental health care settings across the lifespan Features NCLEX preparation questions, vivid clinical scenarios, and evidence-based practice summaries Addresses the most current ISPN and APNA competencies A new chapter with DSM-V updates is available Both student and teacher digital aids, including review guides, summaries, hyperlinks to films and video, and drug monographs are available A test bank and PowerPoint slides are also available for instructors eBook Features (available in all eBook formats): Bidirectional link between Key Terms and their glossary definitions Learning Outcomes at start of chapters link to respective sections in book Hyperlinks to supplementary films and videos Care plans DSM-V update This book is also available as part of a discounted set. This new edition of a bestselling, evidence-based textbook provides a comprehensive overview of psychiatric and mental health nursing. Keeping service users and their recovery at the centre of care, the holistic approach will help nurses to gain the tools and understanding required to work in this complex area. Extensively updated for this new edition, the text looks at: Aspects of mental health nursing: covering topics such as ethics, developing therapeutic relationships and supervision. The foundations of mental health nursing: discussing diagnosis, assessment and risk. Caring for those experiencing mental health distress: looking at wide range of troubles including anxiety, bipolar disorder, eating disorders and issues around sexuality and gender. Care planning and approaches to therapeutic practice: exploring ideas, pathways and treatments such as recovery, CBT, psychodynamic therapies and psychopharmacology. Services and support for those with mental health distress: covering topics such as collaborative work, involvement of service users and their families and carers, and a range of different mental healthcare settings. Mental health nursing in the twenty-first century: highlighting emerging and future trends including the political landscape, physical health and health promotion, and technological advances. This accessible and comprehensive textbook integrates service user perspectives throughout and includes student-friendly features such as learning outcomes, key points summaries, reflection points and further reading sections. It is an essential resource for all mental health nursing students, as well as an invaluable reference for practising nurses.
