The current, thoroughly revised and updated edition of this approved title, evaluates information sources in the field of technology. It provides the reader not only with information of primary and secondary sources, but also analyses the details of information from all the important technical fields, including environmental technology, biotechnology, aviation and defence, nanotechnology, industrial design, material science, security and health care in the workplace, as well as aspects of the fields of chemistry, electro technology and mechanical engineering. The sources of information presented also contain publications available in printed and electronic form, such as books, journals, electronic magazines, technical reports, dissertations, scientific reports, articles from conferences, meetings and symposiums, patents and patent information, technical standards, products, electronic full text services, abstract and indexing services, bibliographies, reviews, internet sources, reference works and publications of professional associations. Information Sources in Engineering is aimed at librarians and information scientists in technical fields as well as non-professional information specialists, who have to provide information about technical issues. Furthermore, this title is of great value to students and people with technical professions.

This is a guide to deciding on the right career and changing jobs using the World Wide Web. Sorted into occupational groups, it includes everything from accountancy to zoology with over 1000 Web sites listed.

Hispanic Engineer & Information Technology is a publication devoted to science and technology and to promoting opportunities in those fields for Hispanic Americans.

Hispanic Engineer & Information Technology is a publication devoted to science and technology and to promoting opportunities in those fields for Hispanic Americans.

"This book provides a framework for conceptual, theoretical, and applied research in regards to the relationship between technology and humans"--Provided by publisher.

" This book looks to cover the differences the new professional will encounter as he takes on his new position overseas ". The book not only covers the basic technical translations of the items likely to be encountered during your work, but also covers what I would call the " unspoken word " These are cultural differences, such as technical phrases, modern work concepts terminology, standard practices. The book takes the student through all stages of construction and explains in detail the principal phases that the student is expected to understand & know in the new Hi tech and fast changing environment. It will be a good reference book which will enable the student to rapidly adapt to their new environment by helping them understand the basic principles, working practices, descriptions etc which some countries will take for granted. A great aid for the aspiring foreign professional, I only wish it was available when I first came to Spain some 23 years ago! Peter Wilkey FCIQB CIOB Ambassador for Spain & Gibraltar ...
