process of growing grapes, with a month-by-month maintenance guide covering all regions of the U.S. and Canada. He explains everything a beginning grape grower needs to know: how to design and build a vineyard, how to select grapes for each region, how to maximize yield using organic maintenance techniques, how to build a trellis, how to harvest at peak flavor, and how to store grapes for winemaking. This edition includes organic growing information and all new photography.

influence the quality of a vintage. A vineyard owner and lifelong wine lover, the author encourages readers to discover wine by tasting, taking notes, and tasting again. The book also includes a richly illustrated, full-color reference section on a select group of vineyards from all over the world, describing their history, winemaking philosophy, terroir, and top vintages—what Chilton calls benchmark wines. The characteristics of these memorable wines provide the essential starting point to understand what to look for when evaluating any wine. Equipped with this easy-to-read reference, readers will have all the tools they need to begin their own wine journey.

Also included are 16 case studies on successful organic, biodynamic, and sustainable wineries from the San Francisco North Bay Region, focusing on how what each has done can be replicated.

On October 12, 2005, a massive fire broke out in the Wines Central wine warehouse in Vallejo, California. Within hours, the flames had destroyed 4.5 million bottles of California's finest wine worth more than \$250 million, making it the largest destruction of wine in history. The fire had been deliberately set by a passionate oenophile named Mark Anderson, a skilled con man and thief with storage space at the warehouse who needed to

cover his tracks. With a propane torch and a bucket of gasoline-soaked rags, Anderson annihilated entire California vineyard libraries as well as bottles of some of the most sought-after wines in the world. Among the priceless bottles destroyed were 175 bottles of Port and Angelica from one of the oldest vineyards in California made by Frances Dinkelspiel's great-great grandfather, Isaias Hellman, in 1875. Sadly, Mark Anderson was not the first to harm the industry. The history of the California wine trade, dating back to the 19th Century, is a story of vineyards with dark and bloody pasts, tales of rich men, strangling monopolies, the brutal enslavement of vineyard workers and murder. Five of the wine trade murders were associated with Isaias Hellman's vineyard in Rancho Cucamonga beginning with the killing of John Rains who owned

the land at the time. He was shot several times, dragged from a wagon and left off the main road for the coyotes to feed on. In her new book, Frances Dinkelspiel looks beneath the casually elegant veneer of California's wine regions to find the obsession, greed and violence lying in wait. Few people sipping a fine California Cabernet can even guess at the Tangled Vines where its life began.

Traces the history of the New York wine industry as it evolved across the state. Winegrower and journalist Richard Figiel offers the first comprehensive history of New York wine, following its turbulent evolution across the state and emerging as a dynamic player in the world of fine wine. He begins by examining New York's distinctive viticultural roots and the geologic forces that shaped the state's terrain for winegrowing. Starting with

early efforts to grow grapes for wine in the Hudson Valley, the story moves west to the Finger Lakes and Lake Erie, circles around the state from Long Island to the North Country, and, finally, to contemporary New York City. Through industry booms and busts, he explores the New York wine industry's continuing process of reinvention by resourceful immigrants, family dynasties, giant corporations, and back-to-the-land dreamers. Moving across centuries of winemaking, Figiel unfolds an extraordinary array of grape species, varieties, and wines. "This is a clear and coherent theme—the evolution of an important modern wine industry in New York. It is the most complete history of this topic." — Ian A. Merwin, viticulturalist at Cornell University, coauthor of *A Grower's Guide to Organic Apples* "What works is when the book weaves between

providing basic history and then anecdotes that illuminate that history. I had difficulty putting the book down because it was entertaining. This should make a very fine contribution to the literature of wine-making in New York.” — John C. Hartsock, author of *Seasons of a Finger Lakes Winery*

The lush, sun-drenched vineyards of California evoke a romantic, agrarian image of winemaking, though in reality the industry reflects American agribusiness at its most successful. Nonetheless, as author Erica Hannickel shows, this fantasy is deeply rooted in the history of grape cultivation in America. *Empire of Vines* traces the development of wine culture as grape growing expanded from New York to the Midwest before gaining ascendancy in California—a progression that illustrates viticulture's

centrality to the nineteenth-century American projects of national expansion and the formation of a national culture. *Empire of Vines* details the ways would-be gentleman farmers, ambitious speculators, horticulturalists, and writers of all kinds deployed the animating myths of American wine culture, including the classical myth of Bacchus, the cult of terroir, and the fantasy of pastoral republicanism. Promoted by figures as varied as horticulturalist Andrew Jackson Downing, novelist Charles Chesnut, railroad baron Leland Stanford, and Cincinnati land speculator Nicholas Longworth (known as the father of American wine), these myths naturalized claims to land for grape cultivation and legitimated national expansion. Vineyards were simultaneously lush and controlled, bearing fruit at once culturally refined and naturally robust, laying claim to both

earthy authenticity and social pedigree. The history of wine culture thus reveals nineteenth-century Americans' fascination with the relationship between nature and culture.
