In a previous collection, Jack Daniels Stories Vol. 1, I included all of the Lt. Jacqueline "Jack" Daniels short stories that have been published in anthologies and magazines throughout the years. This book is something different. In 2016, Amazon tried an experiment called Kindle Worlds, which allowed other authors to write stories in my universe using my characters. Because I enjoy collaboration, I co-wrote stories with a select few of these authors. I had a lot of fun, and got to work with many talented people, some of them old pros, some of them rising stars. This resulted in over 1000 pages of good stuff featuring Jack Daniels, Phineas Troutt, Harry McGlade, Chandler, Hammett, and Tequila. For the first time, these stories have been compiled into three new collections. Vol. 2 includes: JACKED UP (with Tracy Sharp) - Jack teams up with former repo girl Leah Ryan. FLOATERS (with Henry Perez) - Jack and Chicago reporter Alex Chapa form an uneasy alliance. BABYSITTING MONEY (with Ken Lindsey) - Jack and PI Gavin English investigate a slavery ring. RESCUE (with Ann Voss Peterson) - Her codename is Chandler. His name is Tequila. Things are going to get hot. A GAME OF POOL - The long-lost missing section from Bloody Mary. SUCKERS (with Jeff Strand) - Harry McGlade. Andrew Mayhem. One million bad jokes. And vampires. If you are a more sensitive (or adventurous) reader, this handy scale rates specific categories from 1 (lowest) to 10 (highest) to give you some idea if this is your kind of book. JACK DANIELS STORIES VOL. 2 by JA Konrath Scary - 5 Violent - 7 Funny - 8 Sexy - 7 Crossover - Characters also appear in the Jack Daniels Thriller series, the Codename: Chandler series with Ann Voss Peterson, and the Konrath Dark Thriller Collective series

From the bestselling author of The Battle for America 2008 and longtime Washington Post correspondent, an inside view and analysis of the Obama-Romney presidential race In 2008 a bright young candidate triumphed on a theme of change and hope. Four years later an embattled President struggled against an apocalyptically divided and divisive Congress, a war that won ' t end, and an economy that casts a dark penumbra over every spark of good news. His opponent, a well-heeled businessman who couldn't seem to stand on his own business record, withstood unexpected and extreme opposition to capture the nomination of a party whose main platform and principles with which he was historically and fundamentally at odds. The 2012 Election, once predicted to be a boring run at a popular President, took on a new urgency with the infamous 2010 midterm shellacking and equally infamous Citizen United ruling, and delivered drama and tension as the Republicans tried to reconcile the factions at war within their party and Democrats faced the tsunami of super Pac money flooding local and regional elections. As with his last book, The Battle for America 2008, Washington Post correspondent Dan Balz uses a combination of superb sources and long, deep reporting experience to take us both deep inside and far beyond Campaign HQs in Chicago and Boston. He tracks the nuances

of Beltway politics and the thinking behind the scenes to show how Obama regained his footing, and to speculate about whether this election actually did anything to change the toxically poisonous atmosphere inside the Beltway, the increasing hostility and disenchantment with politicians outside, and the frightening effect of the torrent of money being poured out by special-interest groups beholden to no voter or law? Will there be anything in this election that will heal the political process in America? Special highlights include two much talked-about post-election interviews with Romney and Christie which have been making headlines, as well as a new afterword.

Dr Kay Scarpetta is working a suspicious death scene in Cambridge, Massachusetts when an emergency alert sounds on her phone. A video link lands in her text messages and seems to be from her computer genius niece Lucy. But how can it be? It's clearly a surveillance film of Lucy taken almost 20 years ago. As Scarpetta watches she begins to learn frightening secrets about her niece, whom she has loved and raised like a daughter. That film clip and then others sent soon after raise dangerous legal implications that increasingly isolate Scarpetta and leave her confused, worried, and not knowing where to turn: not her FBI husband Benton Wesley or her investigative partner Pete Marino. Not even Lucy.

The poetry and stories in section 1 are from Families published separately in conjunction with Writershed, the Women Writers Workshop, a group Kay founded in 2011, now on Amazon and Kindle. The other stories are a selection from new projects Kay is working on. "The Spinster" is an extract from her biography of her mother's life. "The Snowchild" is an extract from her children's book Joshua's Globe. Kay hopes to complete these projects in the near future as well as help the Writershed group to put together their second book. The best seller is still a long way in the future, and Kay has no illusions about how tough it is to get started as a writer. But one word of advice she can give to all those budding writers out there is to "write every day and make writing part of your life as that book inside you will never happen just talking about it."

We are now standing at the precipice of the next transformative development: the Internet of Things. Soon, connected technology will be embedded in hundreds of everyday objects we already use: our cars, wallets, watches, umbrellas, even our trash cans. These objects will respond to our needs, come to know us, and learn to think on our behalf. David Rose calls these devices--which are just beginning to creep into the marketplace--Enchanted Objects. Some believe the future will look like more of the same--more smartphones, tablets, screens embedded in every conceivable surface. Rose has a different vision: technology that atomizes, combining itself with the objects that make up the very fabric of daily living. Such technology will be woven into the background of our environment, enhancing human relationships and channeling desires for omniscience, long life, and creative expression. The enchanted objects of fairy tales and science fiction will enter real life. Groundbreaking, timely, and provocative, Enchanted Objects is a blueprint for a better future, where efficient solutions come hand in hand with technology that delights our senses.

An utterly propulsive and unpredictable psychological thriller from stunning new talent T. Marie Vandelly. She didn't run from her dark past. She moved in. For the lucky among us, life is what you make of it; but for Dixie Wheeler, the theme music for her story was chosen by another long ago, on the day her father butchered her mother and brothers and then slashed a knife across his own throat. Only one-year-old Dixie was spared, becoming infamously known as Baby Blue for the song left playing in the aftermath of the slaughter. Twenty-five years later, Dixie is still desperate for a connection to the family she can't remember. So when her childhood home goes up for sale, Dixie sets aside all reason and moves in. But as the ghosts of her family seemingly begin to take up residence in the house that was once theirs, Dixie starts to question her own sanity and wonders if the evil force menacing her is that of her father or a demon of her own making. In order to make sense of her present, Dixie becomes determined to unravel the truth of her past and seeks out the detective who originally investigated the murders. But the

more she learns, the more she opens up the uncomfortable possibility that the sins of her father may belong to another. As bodies begin to pile up around her, Dixie must find a way to expose the lunacy behind her family's massacre to save her few loved ones that are still alive--and whatever scrap of sanity she has left.
