developmental psychology, it includes chapters on perceptual/motor development and cognitive development.

Intended for courses on theories of human development, this new text

Acces PDF Life Span Development 16th Edition

9781259550904
presents nine theories
grouped into three major
families - those that
emphasize biological
systems; those that
emphasize environmental
factors; and those that
emphasize a dynamic

9781259550904
interaction between biological and environmental forces. The nine theories selected have a long and productive history in human development and continue to evolve as a result of new insights. The inclusion of

Acces PDF Life Span Development 16th Edition

9781259550934
social role theory and life course theory expand the book's relevance to the study of adulthood and aging. Grouping the theories by families enhances students' ability to think critically about theoretical

ideas, assess the strengths and weaknesses of each theory, and gain a deeper understanding of how each theory guides research and application. The three families are introduced with a brief overview of the

Acces PDF Life Span Development 16th Edition

9781259559904
unique perspectives of each theory and the rationale for grouping these theories together. Discussion of each theory includes: the historical and cultural context in which the theory was developed; an overview

of key concepts and
important ideas; new
directions in contemporary
scientific work; a research
example illustrating how the
theory has been tested and
modified; an application
showing how the theory has
