Warm-water islands are a cohesive group of islands distinguished by their geography and remoteness, history as former colonial territories, and dependence on external stakeholders for their economic and social development. Warm-water island destinations also have a year-round tourism industry. These island tourism destinations are facing unprecedented adjustment challenges in the wake of increasing globalization and susceptibility to external shocks, and are in search of appropriate policy responses to that globalization. It is critical for small islands to understand how these challenges affect tourism performance and how they impact their residents. Tourism Management in Warm-water Island Destinations unearths the critical aspects that contribute to tourism development and growth in islands. Particular emphasis is placed on destinations such as the Caribbean, with lessons learned that are applicable to other island tourism contexts in the Mediterranean, Indian Ocean and the Pacific. This book provides a platform for emerging systemic perspectives of the various aspects of island tourism, with the view that strategies

for the management and development of tourism in island environments can be improved and will be of interest to those studying and researching within destination management.

This book illustrates how CSR can be used as a tool to improve corporate governance in organizations and improve the relationship between business and society. Connecting corporate social responsibility (CSR) with corporate governance (CG) is a 21st century challenge, and the book argues that CSR and CG should be addressed together in synergy in the management literature. Linking these two crucial business functions, it describes the preconditions for successful integration and the tools for practical implementation. Volume 1 covers corporate governance from the perspective of CSR, where responsible and sustainable business is a common goal and the tasks are to create core values, business policy and organizational strategies.

Whether through education, sport or festivity, events form the basis on which we attribute cultural meaning, significance and value to our lives. In this light, community events have the potential to create positive and negative social, cultural, economic and environmental impacts within the community across a wide variety of genres and platforms. This book offers a deeper and more critical insight into the relationships, dynamics and planning processes of festivals and events and the impact this has upon authenticity, cultural consumption and the local communities they serve. It does so by looking at a range of key debates in power theory, event planning and design, event construction, experience and meaning, authenticity, sustainability, social inclusion, accessibility and sponsorship engagement. International case studies are embedded within the chapters, examining

the role of stakeholders, local communities, organisers, local governments and infrastructure. This critical event studies text is interdisciplinary and will make valuable reading for students and researchers who are interested in the relationships and dynamics involved in the construction and planning of festivals and events, their immediate impact and their significance for the future.

The aim of this essay is to evaluate the extent to which insights from behavioural economics might improve strategic decision-making in organisations. In order to see how this works in practice, this essay will consider one of the largest airline companies in Germany. Within the airline company, the most important question is this: What is the best way to make decisions in a large company like this? In the current economic environment, competition is tougher than in previous years. As a result, a wrong decision can lead to greater losses than before. Some airline companies might lose their market leadership position through a wrong decision or by being unprepared for a specific situation. Because of this, strategic planning becomes a key factor in a company's decision-making process. Avoiding mistakes and wrong decisions by improving the decision-making process within the company should be the aim of any firm that tries to defend or increase its market share.
