This is Shirley Mays' third book. She is a North Carolina real estate broker and an environmental consultant. She has a Research Center at the Cotton Exchange in Wilmington, North Carolina. This book is about a conspiracy to defraud the United States taxpayers perpetrated by individuals employed by the Resolution Trust Corporation (RTC) and its successor agency on the matter in question, the Federal Deposit Insurance Corporation (FDIC). The Resolution Trust Corporation was a US government-owned asset management company mandated to liquidate assets of the defunct savings and loan associations ("S&Ls").

Between 1989 and mid-1995, the RTC closed or otherwise resolved 747 Savings & Loans Institutions (known as thrifts) with total assets in the hundreds of billions of dollars. Shirley Mays was certified by the RTC and the FDIC as a minority woman -owned corporation. She became an “ insider ” and a whistleblower. Her “ whistleblowing case ” filed with the Department of Justice in July of 1996 was covered up by the government with lightening speed. She filed an IRS Whistleblower Case in June of 2009. She and her Congressman are now going after the corporate criminals like the IRS went after Al Capone..... for tax evasion. She has their pseudo-Federal ID numbers.

“ Whereas, there is no statute of limitations when you

are able to show that they knew they were committing fraud. The IRS looks at a fraud case entirely differently. It can pursue any case where it can prove the company knew it was cheating, even if the underpayment was 20 years ago. ”

Deals with the result of a study conducted by the FDIC on banking crisis of the 1980s and early 1990s. Examines the evolution of the processes used by FDIC and RTC to resolve banking problems, protect

depositors and dispose of the assets of the failed institutions.

Governments throughout the world confront enormous challenges when divesting. Whether it is poor-performing bank loans in Japan and Korea, military bases in the United States, or real estate in eastern Europe, the challenge of public divestment is more than

just a question of how to map a path to economic efficiency. Conventional wisdom in public management and privatization literature says that the execution of such enormous tasks as divestment is typically done poorly, and that the government strategy is likely to be inefficient. Mark Cassell argues that privatization must be understood as a political and administrative puzzle rather than simply an exercise in economic efficiency. This study of two successful divestment agencies — the U.S. Resolution Trust Corporation and the German Treuhandanstalt — presents a complex understanding of the two agencies' performance in privatizing hundreds of billions of dollars of assets following two very different crises, the savings and loan debacle in the

United States and unification in Germany. In the U.S., the worst economic problem since the Great Depression forced the government to recreate and reshape private property on an immense scale. In Germany, melding East and West Germany involved converting an entire national economy that employed more than four million people. In each case, unassuming public agencies handled two of the largest public sales of assets in this century. Cassell identifies the importance and effects of managerial structures and of national institutions — legislatures and executives — on the outcomes of the reform efforts. This book will be of interest to those interested in alternatives to traditional public-sector structures, electoral connections to
