In the first philosophical book wholly about photography, Patrick Maynard dispels some basic, persistent confusions by treating photography as a technology—a way to enhance and filter human power. Once photography is understood as a kind of technology, Maynard argues, insights about technology may be applied to provide the general perspective on photography that has been missing.

This rocker is going where no rocker has gone. Seventeen-year-old eco-conscious rocker Zach wants nothing more than to see all Malibu High bands together on one stage again. This is his master plan to finally bring all the cliques together for one day of unity, despite the fact that principal Nelson has ditched his festival revival idea saying that he needs a more "serious" project if he plans to raise real funds for the school. But when a rogue scientist claims that Zach's latest song contains the one bit of information he's long been searching for to prove the existence of dark matter -which he needs to get irrefutable scientific evidence of the building blocks of happiness itself- light festivals are held worldwide, enemies put down their guns, all wars come to an end. Zach's not quite clear what the scientists are still bickering about, Zach seizes this media opportunity as a chance to turn his fortune around and get the festival up and running. Out are winning school debate competitions and organizing puny cupcake fund-raisers. In are the onslaught of free publicity and air time brought in by the scientific controversy. But the media frenzy comes at a price. In THE CUPCAKE PLAN, Zach confronts the most awesome--and most confusing--time of his life. It's a Melvillian attempt to illustrate the true nature of being green that proves what greenness could mean for the world-way beyond reversing climate change and the virtues of organic farming.

Between 1996 and 2000 the renowned architects Herzog & de Meuron built a new research centre together with a library, auditorium and cafeteria for the pharmaceutical company Roche in Basle. Situated on the outskirts of the town on the edge of the industrial area, the building was to include a closed section for laboratories yet should also be publicly accessible: the ideal starting point for an interdisciplinary solution. Artist Rémy Zaugg worked together with the architects developing the colours used. In particular he created a dramatic blue wall which separates public and restricted areas. This publication documents the entire project from its genesis to the completed construction, using texts, sketches, plans and photographs. More than a mere monograph, this book provides a fascinating glimpse into the creative collaboration occurring between architects and artists.
