A guide to the trends and leading companies in the engineering, research, design, innovation and development business fields: those firms that are dominant in engineering-based design and development, as well leaders in technology-based research and development.

Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemetarians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.

The immense, global transportation and logistics sector is vital to businesses of all types. This carefully-researched book covers exciting trends in supply chain and logistics management, transportation, just in time delivery, warehousing, distribution, intermodal shipment systems, logistics services, purchasing and advanced technologies such as RFID. This reference tool includes thorough market analysis as well as our highly respected trends analysis. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. It contains thousands of contacts for business and industry leaders, industry associations, Internet sites and other resources.This book also includes statistical tables, an industry glossary and thorough indexes. The corporate profiles section of the book includes our proprietary, in-depth profiles of the 500 leading companies in all facets of the transportation and logistics industry. Here you'll find complete profiles of the hot companies that are making news today, the largest, most successful corporations in the business. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.

Beautiful, secluded anchorages, picturesque canals, bustling marinas, dramatic cities - all await those considering a Baltic cruise.The nine countries bordering the Baltic Sea offer an immense variety of cruising grounds, people and cultures. There are thousands of harbours and innumerable anchorages, and it would take an entire bookshelf, to cover them all in detail. The information contained in this book has therefore been chosen for its value both at the planning stages - preparing the yacht, choosing the most suitable route, timing and communications etc - and again on arrival, when a general overview of each individual country is followed by specific harbour information. Where detailed cruising information is readily available - effectively Germany, Denmark, Sweden and Finland - only selected harbours are covered, chosen, with a few exceptions, as fulfilling certain key needs. Where cruising information is more limited - Poland, Kaliningrad, Lithuania, Latvia, Estonia and Russia - many smaller harbours are also featured in detail. In addition to comprehensive suggestions for further reading (and sources in each country from which they may be ordered) more than 200 websites are listed, again chosen for their relevance both at the planning stages and en route. Details of internet access points are included for most major harbours. This 4th edition (2017) has been produced by a team from the Royal Cruising Club and contains substantial changes. Apart from the routine updating of the text and plans - many newly drawn for this edition - and the addition of new photos, there are also some major changes. In particular coverage of Finland has been reorganized, and reflecting the fast pace of change since the last edition, the Baltic States and Poland sections have been improved significantly.

While it is widely acknowledged that the availability of institutional credit is an important pre-condition for the further development of the small-scale fisheries sector of many developing countries, the lack of well-documented information with regard to the reasons for the success or failure of fisheries credit schemes impedes progress in the design and operation of new fisheries credit programmes and revolving loan funds. In order to gain more information in this vital area, the Fishery Industries Division of FAO initiated a series of case studies in Asia, Africa, the Middle East, Latin America and the Caribbean on successful fishery credit programmes and revolving loan funds. Successful was defined by an over-all positive socio-economic impact, the full utilization of credits for their intended purpose, achievement of disbursement targets and satisfactory loan recovery. Each region is represented by two or three case studies, selected on the basis of various institutional and operational circumstances, in order to cover all major settings of fisheries credit operations. The case studies presented in this volume reflect the opinions of their authors who in some cases have been closely associated with the design and implementation of the credit programmes. Some editorial changes have been made to facilitate presentation and comparison, but the substance of the studies and the conclusions reached are those of the authors.
